25X1 25X1 Products for Hypodermic Injections: ammonium chlorate, amidopyrine, astmofilinum, beladin, codeine, phosphate, codeine besoate, codeine hydrochloride, caffeine hydrochloride, calcium carbonate, ephedrine hydrochloride, ephedrine chloride, hipnal, morphine hydrochloride, morphine chloride, sodium carbonate, sodium benzoate, streptochanol, socaline, quinine hydrochloride.

Miscellaneous Products: iron chloride, opodeldon, laxal emulsion, aromatic tincture of iron, belladonna extract.

The Institute of Pharmaceutical Research operated by the LEK plant in Ljubljana is located in the building of the Poljanska secondary school on Poljanska street. All chemicals and medicaments are analyzed by the Institute which has two laboratories, one for the analysis of medicaments and chemicals, and one where properties of inflamable products such as ether, petrol and alcohol are studied. The chief of the Institute, Marijan Dorer, is a chemical engineer and a recognized expert on industrial chemistry. Dorer inspects most of the drugs prepared by Dr. Koch of the LEK plant in Menges. ** Dorer is married, has three children, and lives at the LEK plant on 135b Celovska street. 25X1 opposed to the present regime in Yugoslavia. Another chemical expert at the Institute is Professor Miroslav Pirs who was a member of the "Catholic Action" and the Clerical Slovene Athletic Association (Zveze Fantoviskih Odeskov) before Dusan Rozman and other Domobranci officers. The leader of the Communist Party and UDB unit in the LEK plant is one Vincenc Brank, a member of Tito's partisans since 1942, who has only administrative duties at Lek. He is described as 30 years old, of medium height, thin unshaven face, and in poor health. Two sisters, Marija Ozimic, a pharmacist, and Metka Ozimic, a chemical engineer, are employed in the laboratory. both women are anti-Communist. In addition there are two chemical engineers, both Serbian women, and three laboratory assistants.
